

SOFT, SILICONE GEL

Tputty™ 504 is a soft silicone gel thermal gap filler ideal for applications where large gap tolerances are present.

The silicone gel is filled with a complex matrix of ceramic fillers to yield superior thermal performance.

Tputty™ 504 is soft and compliant transferring little to no pressure between interfaces. Because Tputty™ 504 has a higher viscosity than grease, it eliminates the bleed and pump-out usually associated with grease. Bond line variances can also be more easily controlled than with traditional thermal pads.

Tputty™ 504 can be applied like grease and is easily dispensable from a wide range of commercially available equipment including screen print, syringe and automated equipment.

FEATURES AND BENEFITS

- Soft and compliant transferring little to no pressure between interfaces
- 1.8 W/mK thermal conductivity
- Available in 10cc, 30cc and 55cc syringes
- Available in 100cc, 170cc and 305cc auto dispense cartridges
- Available in bulk containers from sample jars through 20 kg pails
- Applies like grease and is easily dispensable from a wide range of commercially available equipment including screen print, syringe and automated equipment

APPLICATIONS

- Flip chip microprocessors
- PPGAs, micro BGAs, BGAs
- DSP chips, graphic accelerator chips
- Other high-wattage electronic components
- LED lighting
